

# MapEM

## Electromagnetic maps

### Non-Ionizing Radiation maps

Assessment exposure levels over large areas of cities or territories

### Compliance with ITU-T K.113

ITU recommendation on RF-EMF maps

### Drive Test

Data gathered by drive test

### Visual Communication

Colour and pattern codes

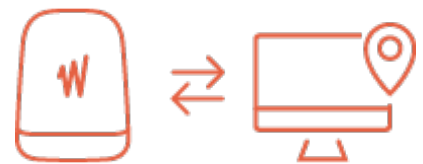

#### Easy installation

We supply a removable adapter to install the MonitEM device in any sort of vehicle. Fast and easy to install.

#### DRIVE TEST WITH MonitEM

The same MonitEM device is used to take continuous readings from the vehicle, controlled by specific drive test software (MapEM Reader).

#### Easy to export

Records, with the format [Date/time – GPS Position – NIR Level], are integrated into a map for easy display and interpretation.

# Supplementary solutions

SMP2  
EMF / NIR portable meter

MonitEM  
Continuous monitoring
